

RAPID (15 minute) test kits are in short supply Nation-wide. Once we run out of RAPID test supplies at the Wellness Center, we will be testing with all send out tests which result in 2+ days.

We will be doing send out tests on those who have symptoms and should be home anyway and don't need immediate results. We will treat it as a positive until the results are back.

We will reserve the RAPID tests for those who need tested to be at work or other valid reasons.

You need to meet the criteria as a CLOSE CONTACT to be tested with a RAPID test. If you are tested with a send-out test you need to stay home until your results return.

Please be patient and understanding with the testing staff as they are just trying to preserve the supplies we have for the highest need.

Order FREE home tests at:
