

Tree removal around the Utilities water system.

The Chehalis Tribes Utility department and Grounds department have identified trees within the systems reach that need to be removed and will provide the following benefits:

- 1) New water lines are being added to improve service and incorporate our new well
- 2) To protect the existing infrastructure from limbs and leaves that have been damaging
- 3) To open the view of the new artwork added to the tanks.

Wood removed will be stacked at the shop by the healing house for Tribal members to cut and use for firewood.

Any concerns or needs please reach out to Brian von Clück at 360-709-1862 or at bvoncluck@chehalistribe.org on or before 10/15/2024.

Help our tanks and artists be recognized!

We have been nominated by the manufacturer to become "tank of the year". Your vote will help our tanks win and our artists work be recognized.

Go to:

<https://www.tankoftheyear.com>

and cast your support for the towers and our artists Cricket Amanda Jennings and Ryan Burnett!
