

Bicycle Connections Survey: Share Your Thoughts!

Ever had the experience of bicycling somewhere and your bike lane just... ending? Do you wish you could safely bike to more places?

Riding a bicycle is an economical and environmentally friendly way to get around, but there are challenges to bicycling in communities throughout Thurston County. That's why Thurston Regional Planning Council (TRPC) is working on [a project](#) to make our region's network of bicycle routes safer, more connected, and more convenient.

TRPC wants to learn what challenges you face when it comes to bicycling in our region, and what you envision for the future of bicycling. Your feedback will shape our region's priorities!

[Please take our brief, 10-minute survey here!](#) The survey is available until June 30.
