

# CONFEDERATED TRIBES of the CHEHALIS RESERVATION

Fish & Wildlife Program

360-709-1857

**\*\*ATTENTION COMMUNITY\*\***

Due to the shifting river conditions this past winter, the Fisheries Program is asking community members if, when visiting the river, if they see any mussels in areas that may be drying up to please contact us. As the river changes it can leave our freshwater mussels in side channels that tend to dry up as we enter our summer season and can kill entire shellfish beds.

Do **NOT** remove or relocate these mussels yourself, they need to be tended to in a specific manor.

Thanks for your help.
